RAHUL SHARMA

Jalandhar, Punjab, India | rahul.cse.fictional@example.com | github.com/rahulsharma-ai

[FICTIONAL SAMPLE FOR TESTING PURPOSES ONLY - CONTAINS NO SCHOLARSHIP DATA]

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Final Year, Graduating 2026)
Lovely Professional University, Jalandhar | Cumulative CGPA: **8.2 / 10.0**

TECHNICAL SKILLS

Languages & Frameworks: Python, C++, TypeScript, PyTorch, FastAPI, Docker, SQL
Specializations: Deep Learning, LLM Fine-Tuning, Computer Vision, Distributed Systems

KEY ENGINEERING PROJECTS

Neural Code Search Engine (PyTorch, Transformers, FastAPI)
• Built semantic code search utilizing AST embeddings and dual-encoder neural architecture.
• Reduced query retrieval latency by 45% using FAISS vector indexing.

Edge Vision Guard (OpenCV, ONNX, Python)
• Deployed lightweight real-time object detection models for resource-constrained edge devices.

ACADEMIC OBJECTIVES & INTERESTS

Seeking fully funded Master's programs in Computer Science and Artificial Intelligence across **Canada, Germany, and Singapore**. Highly motivated to pursue thesis research with financial assistance due to modest family background.

Verified Document: Fictional test profile for TetraNoodle Hackathon evaluation.
